DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on May 19, 2004 is being considered by the examiner.

Allowable Subject Matter

2. Claims 1-17 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art does not teach or fairly disclose a sense amplifier reference voltage generator circuit for nonvolatile memory devices having the structure as claimed, comprising: at least one sense amplifier bias reference voltage generator (SABRVG) for generating a reference voltage at a reference node; a start-up bias reference voltage generator (SBRVG) coupled to the SABRVG at the reference point; a monitor reference voltage generator (MRVG) for generating a monitor reference voltage; and a comparison module for comparing the monitor reference voltage with the reference voltage to produce a start-up control signal, wherein the SBRVG enhances a discharging speed of the reference voltage during a reading cycle of the nonvolatile memory and when the monitor reference voltage and the reference voltage are matched, the start-up control signal stops the SBRVG from operating, thereby having the SABRVG maintain the reference voltage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
